The PDB database

The main repository of bio molecular structure data is called the PDB found at: https://www.rcsb.org

Lets see what this database contains. Go to PDB> Analyze> PDB statistics> by experiment method and molecular type.

```

Q1: What percentage of structures in the PDB are solved by X-Ray and Electron Microscopy.

```

```

```
[1] "169,563" "9,939"   "8,801"   "2,890"   "170"     "11"
```

Due to the comma in these numbers, they are being read as characters insted of numeric values. I can fix this by replacing "," for nothing with the `sub()` function:

```
x <- pdbstats$X.ray
sum( as.numeric(sub(",", "", x)))
```

```
[1] 191374
```

OR I can use the **readr** package and the `read_csv()`

```
library(readr)
```

```
pdbstats <- read_csv("Data Export Summary.csv")
```

```

> Q3: Type HIV in the PDB website search box on the home page and determine how many HIV-1 protease structures are in the current PDB?

There are currently 4,683 Structures

2. Using Mol*

You can use Mol* directly at the PDB website (as well as UniProt and elsewhere). However, for the latest and greatest version we will visit the Mol* homepage at: https://molstar.org/viewer/. We can input our own PDB files or just give it a PDB database accesion code (w letter PDB code)

3. Introduction to Bio3D in R

We can use the **bio3d** package for structurual bioinformatics to read PDB data into R

```
library(bio3d)

pdb <- read.pdb("1HSG")
```

```
  Note: Accessing on-line PDB file
```

```
pdb
```

```
 Call:  read.pdb(file = "1HSG")

Lets try a new function not yer in the bio3d package. It requires the **r3dmol** package that we need to install with `install.packages("r3dmol")`. On top of this we need a package called "shiny"

```
library(r3dmol)
source("https://tinyurl.com/viewpdb")
#view.pdb(pdb, backgroundColor ="pink")
```

4.Prediciting functional dynamics

We can use the `nma()` function in bio3d to predict the large-scale functional motions of biomolecules.

```
adk <- read.pdb("6s36")
```

```
  Note: Accessing on-line PDB file
   PDB has ALT records, taking A only, rm.alt=TRUE

Q10. Which of the packages above is found only on BioConductor and not CRAN?

msa

Q11. Which of the above packages is not found on BioConductor or CRAN?:

Bio3d-view

Q12. True or False? Functions from the devtools package can be used to install packages from GitHub and BitBucket?

TRUE

Q13. How many amino acids are in this sequence, i.e. how long is this sequence?

214
